

Jordy Muniz

Software Developer

Coding can teach how to tackle new situations and how to react under certain pressure. This taught me how to accept failure in order to achieve success. There is now motivation for joining a community that will help me grow into a stronger developer while also allowing me to help others grow.

Technical Skills

HTML CSS JQuery JavaScript Bootstrap Java EE Java SE MySQL Spring Git with VCS
Paired Programming Thymeleaf Test-Driven Development Object-Oriented Programming

Development Projects

Coffee project - A pair programming project built using HTML, CSS, and JavaScript. The project allows a user to edit, add, delete, and browse through a list of coffees. The search bar was made to cut out any coffees that don't match the characters typed into the search bar.

Contacts manager - A project built using Java with functionality that allows for the user to be able to delete, add, search, and display their contacts. When the user is done, the user has the option to exit out of the application.

Adlister - A pair programming project built using java and mysql. Servlets and, jsp, and DOA was used in order to make a registration and login page. Once the user logs in, they are allowed to create an ad, edit an ad or user, delete an ad, search an ad, and see other ads that other users have created. All the ads and users are stored in a database.
