

Correy Everett

Software Developer

Military veteran and former transportation specialist who has developed a global mindset due to the opportunity to work in multiple countries. Previous engineering and information systems experience combined with a passion for bringing ideas to fruition inspired the transition into web development. Looking forward to building a career that leverages technology to make imagination reality.

Technical Skills

HTML5 • CSS3 • Bootstrap • JavaScript

Development Projects

Movies DB

HTML, CSS, JavaScript, Fetch, JSON

Track your favorite movies with Movies DB. Users can add, delete, or edit the movies in their own personal "database". This project provided an opportunity to practice paired programming and simulate a database with a JSON file.

Weather Map

HTML, CSS, Bootstrap, jQuery, AJAX, OpenWeatherMap API, Mapbox API

Allows a user to designate a location via the drag and drop of a pin or entering a location manually. Through the integration of the OpenWeatherMap API a five day forecast will be returned to the user.

The Coffee Shop

HTML, CSS, Bootstrap, JavaScript

Search a coffee menu through the use of an HTML form that dynamically displays the results and updates the menu in real time based on user input. The user is able to further enhance the search by selecting a blend sub-category.
