Summary

I am a software developer who is passionate about learning new technologies. I Have experience working with a partner from scuba diving. I always strive to do the best I can, and to learn anything I can to be better. I fell in love with coding when I took a computer science class while studying for environmental science. A friend had told me about codeUp, so I decided to get a job at the Toyota plant to save up so I could go to code. Studying environmental science helped build my curiosity and problem solving, and my time as a warehouse clerk at Toyota helped build interpersonal skills.

Skills

Html
css
JavaScript
BootStrap
vcs with Git
Paired Programming
Thymeleaf

Test-Driven Development
Java SE
MySQL
Spring Boot Framework
jQuery
Object-Oriented Programming
Java EE (Servlets, JSP)

Exposure to

Tailwindcss VueJs C# Unity

Development projects

WEATHER MAP PROJECT

A solo project utilizing jQuery Ajax requests to retrieve location information from map box and generate a webpage displaying weather information for that location. It uses html, css and jQuery. I Refactored It to use tailwind through NPM and PostCSS, and the fetch API.

MOVIES APP PROJECT

Project focusing on paired programming and RESTful API requests. It uses css, html, javascript, and jQuery to create a site that allows a user to create, edit, view and delete a movie.

COFFEE PROJECT

Paired programming project focused on manipulating html using javascript. The site allows a user to add, delete, and edit a coffee.

PONG PROJECT

Small solo project that uses html canvas and javascript to create a pong-like game.

Experience

ALDEZ CONTAINERS LLC - SAN ANTONIO, TX

OCTOBER 2018 TO AUGUST 2020
