

Jordy Muniz

Software Developer

Coding can teach how to tackle new situations and how to react under certain pressure. This taught me how to accept failure in order to achieve success. This gives motivation for joining a community that will help me grow into a stronger developer and also allowing me to help others grow.

Technical Skills

HTML CSS JQuery JavaScript Bootstrap Java EE Java SE MySQL Spring Git with VCS
Paired Programming Thymeleaf Test-Driven Development Object-Oriented Programming

Development Projects

Coffee project - This project was a pair programming project built using HTML, CSS, and JavaScript. This is a project that allowed a user to edit, add, delete, and browse through a list of coffees. This search bar was also made to cut out any coffees that don't match the characters typed into the search bar.

Codeup Design project - This was a pair programming project that revolved around being able to replicate a web page design only using HTML, and CSS. Although there is not functionality to the web page other than being responsive to different devices, it did allow for a lot of improvement in my CSS and HTML skills.

Contacts manager - This project was built using Java. The functionality allowed for the user to be able to delete, add, search, and display their contacts. When the user is done, the user has the choice to exit out of the application.

Professional Experience

Target- addison, Texas

Nov 2019 - Feb 2021

Barista

- Worked at the starbuck at Target, would also occasionally work on the Target sales floor
